

#### Foliar Spray Ingredients

Wild Harvested Liquid Seaweed

#### Propellant

CO<sub>2</sub> 30-<50% w/w

#### Directions for Use

Shake aerosol can well before use.

Remove cap, hold can approximately 25cm from plant and spray a fine mist evenly onto plant foliage.

Repeat treatment every 2 - 4 weeks.

Ideal for use on indoor and potted plants, bonsai, herbs, fruits and vegetables, flowering plants such as orchids and roses.

#### Caution

Avoid use on plant foliage in direct sunlight. Liquids applied to foliage in direct sunlight may cause burning.

#### Safety & Storage

Keep out of reach of children. May irritate skin and eyes. Wash hands after use. Wash all edible plants prior to eating. Store below 30°C away from direct sunlight.

Absorbed Through  
Plant Foliage

### Premium Foliar Spray

#### Fine Mist Organic Seaweed Conditioner

CASSA AgriTec's Organic Seaweed Conditioner is a premium, nutrient rich, easy to use aerosol foliage spray that delivers a fine mist conditioner that stimulates plant growth. This non-toxic, water-based, convenient spray is scientifically formulated using wild harvested seaweed minerals that stimulate plant growth. The spray contains an extract of natural phyto-hormones and over 40 trace micro-nutrients specifically formulated to enhance growth in all plant species including indoor and flowering plants, herbs and vegetables. The fine mist spray is absorbed through the plants foliage which improves in the uptake of nutrients and in turn boosts plant growth and longevity of foliage, flowers and fruits. The premium conditioning spray also supports root development and increases the stress resistance of plants to adverse soil, environmental and climatic conditions.
