Description. Estra-4,9,11- triene-3,17- dione (Trenavar, Trendione) and is known as a prohormone to Trenbolone, differing only by a ketone at the 17 position. Similar to other 17-one prohormones, this ketone is the target of 17 β -HSD1, hydrogenating the compound to yield active Trenbolone. Trenavar actually converts in the body into trenbolone.

Anapolon Gunstig Kaufen

Clenbuterol, also commonly referred to as "clen", is a stimulant used to burn off fat. It works by increasing body temperature and heat production which results in thermogenesis. It can result in unwanted side effects such as elevated heart rate, dry mouth, restlessness, insomnia, severe muscle cramps and loss of appetite.
