Trenbolone Acetate 200 Mg

Dbol starter with TMT? (test,tren,mast) About to run a 10 week bulking cycle, It's my first time time using a pre-mix - Elixir TMT 425 (forum spam bot is blocking me posting the contents, or my full cycle, will try to post in comments) In the past i have always started my test/tren cycles with Dianabol Wk 1-12 test e 500mg/wk Wk 1-4 dbol 40mg/day wk 4-12 Tren a .75/eod wk 4-12 Mast a 100mg/eod wk 1-18 Aro 12.5mg/ed wk 5-18 Human Chorionic Gonadotropin (HCG) 500iu/wk Wk 14-18 Clomid 50mg/day wk 14-18 Nolvla 20mg/day I will also be taking 10mg MethylTest tablet only pre work out on shoulder and leg day as those areas are lacking a bit.

Guys: Stats: 27 yo 5'8 190lb 11-12% BF I'm starting a test/dbol/mast cycle next week and I've been conflicted on how I run my mast e. Here's my layout. Test E 1-12 @ 350-500mg Dbol 1-4 @ 20/20/30/30 Mast E 400-600mgs I've seen guys run Mast throughout the whole cycle or on just the last 8 weeks? I've heard masteron blends with Dbol real well. This current cycle is test 400, tren, mast and dbol. I've been told to use 1cc each three times a week 1200 mg of test. 600 mg of tren,600mg mast. 50 mg a day dbol. I'm concerned because this test is 400 and I've read that 800mg was more than enough two times a week. I initially was doing .500 tren and 1cc of test and .50mg of dbol. Dbol is great because of it's estrogen effects, (water retention). If you take masteron you are going to negate most of the benefits you are getting from the dbol. Start your PCT 2-3 weeks after your last pin and cut back on how long you use your orals. Use for 4 weeks. Add a liver support if you have the money.
