

Description

After confirming the size of the embroidery frame and the coordinates of the center position, set the embroidery frame.

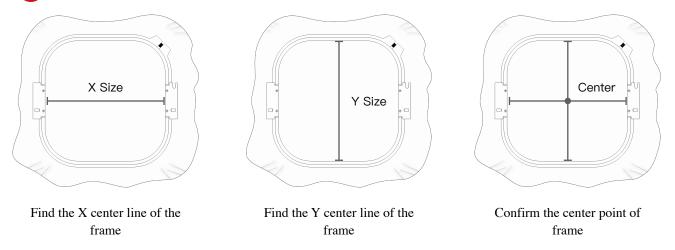

- For no rounding corners, R is set to 0.
- The coordinates of Xcenter and Ycenter of embroidery frames of the same type are the same, but the sizes of Xsize and Ysize are different.
- The size of the input Xsize and Ysize should be 30mm smaller than the actual embroidery frame as a safety distance.
- 1 It is not recommended to adjust Xcenter and Ycenter coordinates easily.

Add Frame Manually

1 Put backing fabric.

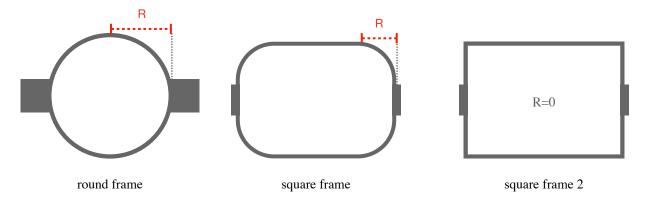

2 Measure the center point of the frame and record the dimensions in the X and Y directions (in mm).

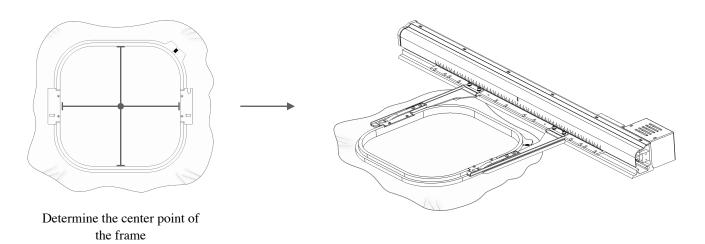

- 3 Calculate the frame circle (R) and record it.
- No rounding corners, R set to 0.

The length (mm) of the red line segment is the embroidery rounding corners.

Add Frame Manually

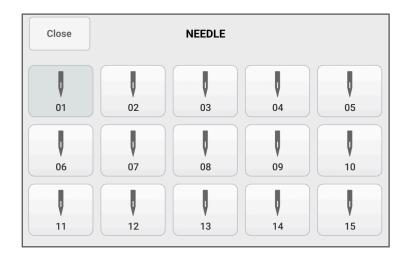

4 Install the embroidery frame to the machine.

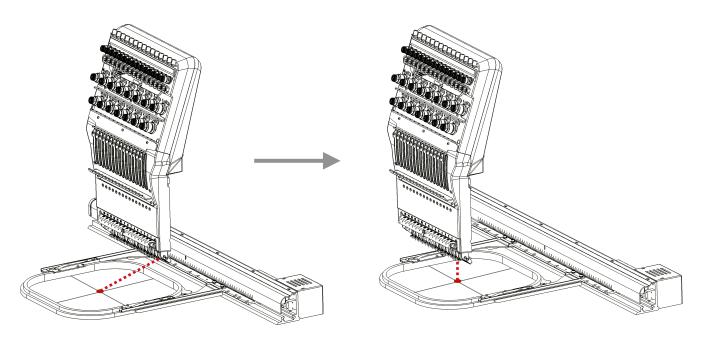

5 Find the origin point automatically.

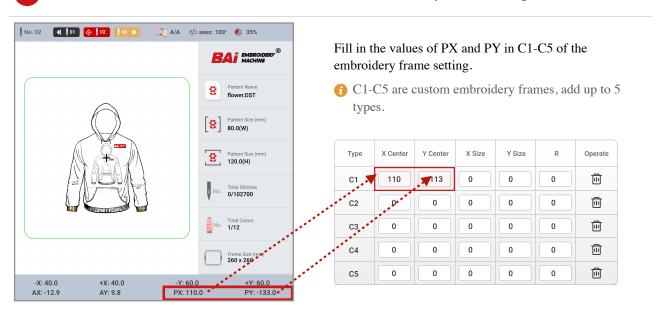

7 Use the direction keys to move the embroidery frame so that needle No. 1 coincides with the center point of the embroidery frame

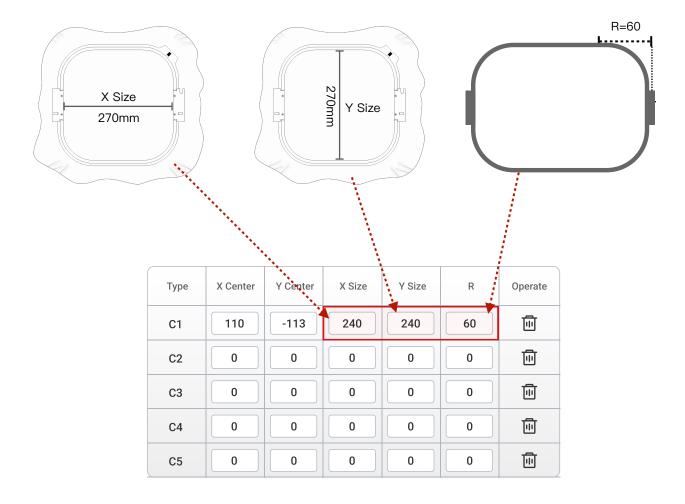

8 Record the values of PX and PY and fill them in the embroidery frame settings.

Add Frame Manually

- 9 Fill in the recorded X Size, Y Size and circle R values in the embroidery frame settings.
- No rounding corners, R set to 0.
- The size of input X size and Y size should be 30mm smaller than the actual embroidery frame as a safety distance.
