

TPS Component Series Amended Soil Autoflower Feed Chart

Using amended soil can reduce your liquid nutrient needs and aid a microbe rich environment for roots. All amended soils, including 'water-only' soils, can benefit from additional bioavailable nutrition; this both balances out nutrition and increases final yield and quality. All amended soils are not equal so please adjust TPS Component Series feed rates as needed based on your particular soil. If you have a question about feed rates, feel free to shoot us an email.

Amended 10 Week Autoflower	(mL/Gallon)	Wk 1	Wk 2	Wk 3	Wk 4	Wk 5	Wk 6	Wk 7	Wk 8	Wk 9	Wk 10
	Base A	2	3	3	4	5	5	5	5	5	3
	Base B	2	3	3	4	5	5	5	5	5	3
	Silica Gold	2	2	2	2	3	3	3	3	2	0
	CalMag OAC	2	2	2	2	2	1	1	1	1	0
	N-Primer	2	3	3	3	3	0	0	0	0	0
	Root Boost	1	1	1	1	1	1	0	0	0	0
