

TPS Component Series Coco and Peat Autoflower Feed Chart

Coco-Coir and Peat mixes are by far the most popular mediums with our growers. They're great for producing consistent crops, and allow growers 'near-hydro' control but with a greater buffer. In general, Coco based material need additional Calcium and Magnesium as there elements tie up in the medium. TPS Component Series was built for this and if you follow the feed chart then your plants will be lush and healthy.

	(mL/Gallon)	Wk 1	Wk 2	Wk 3	Wk 4	Wk 5	Wk 6	Wk 7	Wk 8	Wk 9	Wk 10
Coco/Peat 10 Week Autoflower	Base A	3	4	6	7	5	5	4	4	4	4
	Base B	3	4	6	7	5	5	4	4	4	4
	Silica Gold	2	2	4	4	4	4	4	4	2	0
	CalMag OAC	1	1	2	2	2	2	2	2	1	0
	N-Primer	4	4	4	4	0	0	0	0	0	0
