

TPS One Hydro and Deep Water Culture Autoflower Feed Chart

Hydro and hydro-hybrid systems are some of the most technical and sensitive methods of growing. Each grower's input water, strains, growing style, and environmental conditions will affect feed rates. See below for recommended feed charts, PPM levels, and feedwater pH. Please note, TPS One is likely more bioavailable than other nutrients you've experienced before so we suggest trying a lower PPM (10-20%) than you are used to.

TPS One 10 Wk. Hydro & DWC (mL/Gal)	Wk 1	Wk 2	Wk 3	Wk 4	Wk 5	Wk 6	Wk 7	Wk 8	Wk 9	Wk 10
	5	5	7	7 to 8	8 to 9	9 to 10	10	10	10	8

For 8 Week Strains: please cut out feed chart weeks 4 and 9.

For 9 Week Strains: please cut out feed chart week 9.
