

Absorber Panel Datasheet

The same absorber panel material used in the manufacture of the Arctica Solar 1500 Series Gen 3 heater, for purchase as an individual part for DIY heater construction without having to source or paint your own absorber surface as part of your customer heater build. This can be cut to size for your project using tin snips.

Feature	Notes
Part Number	P02
Size	37.375" x 76.75"
Material	Aluminum substrate + Selected surface coating + protective plastic film (to remove before use)
Shipping	Rolled into cylinder for shipping in 10" x 10" x 38" box. <i>Rolling process will add minor deformations to absorber that will not affect long term performance.</i>
