

30°C Normally Open Thermal Switch

A 30°C Normally Open (NO) Thermal Switch designed to stay open until the heater is above 30 °C of temperature (i.e., the heater is hot enough internal to deliver hot air) and then closes. This is the same thermal switch used in the factory assembled 1500 Series Solar Air Heater, Gen 2, and provided with the P05 Intake Collar Assembly.

Feature	Notes
Part Number	P07
Specifications	30°C Normally Open (NO) Thermal Switch with blade leads
