

## Washable Air Intake Filter Material

A course 4.5" x 4.5" square of washable air intake filter material, designed to filter dirt, dust and debris out of the incoming air stream before it reaches the interior of the heater. Filtering incoming heater air will significantly reduce lifetime soiling of the heater and increase lifetime heater performance. This is the same filter material provided with the 1500 Series Solar Air Heater, Gen 2.

Feature	Notes
Part Number	P08
Specifications	Washable air filter material, 4.5" x 4.5" piece
