HEIRLOOM

THE ART OF REACTIVE GLAZE

Reactive glazes bring unexpected beauty and character to every piece. After melting or oxidizing during firing, this family of glazes creates **subtle yet striking variations in color, texture, and feel**. This artful technique results in **original pieces with organic effects**, exuding unique and one-of-a-kind charm.

With organic shapes, varied tones, and imperfect textures, our Danica Heirloom reactive glaze collections feel at home anywhere.
