

BC254 SPOT COVER

The specialty rub-through primer.

For perfect edges & patchwork repair.

Spot Cover is a specialty coating designed for easy and convenient priming of a number of substrates.
This Primer provides a smooth base for topcoat application.

Spot Cover has excellent flexibility and adhesion properties that enables it to be applied to most flexible and rigid surfaces. It is fast drying, provides superior fill and build, and is easy to sand.

Spot Cover is compatible with most industrial and automotive topcoats.
