

# Electric Sanitising Fogger / Fumigator Machine

SKU: GEQSULVF01

80%+  
ALCOHOL

FOG THE  
WORLD!

The Sanitising Fumigator is effective in eliminating 99.9% of germs when used with our 625 Sanitising Spray, which complies with the World Health Organisation's formula guidelines.

Effective in many environments, whether it be gyms, schools, hospitals, medical offices, shared vehicles or any other workplace or public space, the Sanitising Fumigator will ensure a germ-free and safe environment.

The fog is created by a high speed fan in the machine which means the solution is not heated like thermal foggers.
