

Non sinking

Non shrinking

No beeswax

Interior grade

Colours to suit almost any timber

Waxstix are so easy to use and so handy for quick repairs to scratched or damaged timber, their #1 Feature is it can be coated and stained. Also as Waxstix contain no beeswax they will not leave any white ring marking otherwise known as the "halo effect".

For most small scratches, simply rub the stick over the damaged area. For larger, deeper indentations (where Timbermate Water-based Woodfiller cannot be used), heat a knife blade with a flame or a soldering iron or stove lighter and fill damaged area with hot wax. Remove excess wax by rubbing with the smooth side of sandpaper, a piece of cardboard or old credit card. Use a cotton cloth to buff and remove excess wax.

Applications

Nail Holes

Scratches

Timber Joints

Earl's® Waxstix® Colours

Baltic Pine

Cedar (Boxwood)

Ebony

Mahogany (Meranti)

Maple

Jarrah

Pine
