

MIRKA® DUST EXTRACTOR 1230

Today, health and safety issues are becoming more and more important. Sanding tools and abrasives are made more and more efficient, with focus on dust-free applications. This development places higher requirements on the dust extractors. To meet these demands, the Mirka dust extractor range has been extended with new versions of Mirka dust extractors:

Mirka® Dust Extractor 1230 L PC

Mirka® Dust Extractor 1230 L AFC (AutoFilterCleaning)

Mirka® Dust Extractor 1230 M AFC (AutoFilterCleaning)

IMPROVE YOUR PERFORMANCE

The 1230 dust extractor range is equipped with a high-performance 1200 W motor and a 1-stage turbine that creates 250 mbar suction with an airflow of 4500 l/min. The new 1230 dust extractors include the auto-start function. As the dust extractor only runs when the power tool is in use, thanks to the auto start function, there is less noise and at the same time the dust extractor gains a longer lifetime. Bigger wheels significantly improve maneuverability on uneven floor surfaces. Another advantage is that the filter is easy to reach through a separate opening in the back without removing the upper part.

Mirka Dust Extractor 1230 L PC 230V
EAN: 6416868904444

This professional dust extractor has a high performance motor and turbine, which creates 250 mbar vacuum and 4500 l/min air flow. The AutoStart function increases the lifetime of the motor and reduces noise. A fleece dust bag is also included.

Mirka Dust Extractor 1230 L AFC 230V
EAN: 6416868904727

Flat top with space for storage and large wheels for better maneuverability. Auto-filter cleaning for convenience and consistent performance. Hose and cable storage for more comfortable transportation. A fleece dust bag is also included.

Mirka Dust Extractor 1230 M AFC 230V
EAN: 6416868252521

This professional M-class dust extractor has a high performance motor and turbine, which creates 250 mbar vacuum and 4500 l/min air flow. Auto-filter cleaning for convenience and consistent performance, as well as an air-flow sensor which indicates when air flow falls below optimal. A fleece dust bag is also included.

Technical Specifications

Mirka® Dust Extractor 1230 L / M	
Voltage mains supply	220 – 240 V ~
Mains frequency	50/60 Hz
Power input	1200 W
Volume flow air	4500 l/min
Vacuum	250 mbar
Noise level, LpA	60 dBA
Tank volume	30 l
Dimension W x D x H	385 x 565 x 565 mm
Weight	14.5 kg

Cable storage Simple and effective. The durable strap keeps the cable in place during transportation.

Cable High quality and long reach.

Hose storage Keeps the hose and dust extractor placed together.

Flat top Space for storage during use.

Easily accessible flat filter
The filter is easy to reach through a separate opening in the back without removing the upper part.

Air intake filter Longer life time of motor. A (PET) filter is available as an accessory for even better protection.

Big wheels Significantly improves maneuverability on uneven floor surfaces.

AutoStart function As the dust extractor only runs when the power tool is in use, the dust extractor gains a longer lifetime and makes less noise.

Note! When used together with pneumatic tools an additional accessory is needed

High-performance A 1200 W motor and a 1-stage turbine that creates 250 mbar suction with an airflow of 4500 l/min. These features make the dust extractor well suited for Mirka applications.

Mirka Dust Extractor 1230 L PC is a model that requires manual filter-cleaning, while the two other models (AFC) are equipped with an automatic filter-cleaning system. The efficient filter cleans itself every 15 seconds and which clearly improves the performance of the dust extractor.

Advantages with automatic filter cleaning

- Less maintenance
- Constant performance
- Possibility to work without dust bags
