

Fitting Guide

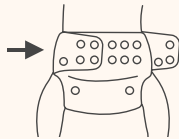

Follow these steps for a flat, comfy, and leak-free finish.

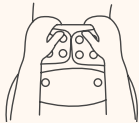

1. PLACE NAPPY UNDER BABY'S BUM
1-2 cm above bubs' bum crack is just right.

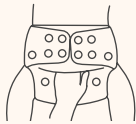

2. PULL THE FRONT OF THE NAPPY OVER
Pull the front of the nappy up to bubs' tum to provide a snug fit around the base.

3. SECURE THE WAIST FLAPS
Pull the waist flaps and snap into place, but not too tight.

4. TUCK AWAY EXCESS WAIST FABRIC
Smooth any excess flaps around bubs' waistline.

5. TUCK UP EXCESS FRONT FABRIC
To get a nice smooth finish on the front.

6. TUCK IN THE LEG ELASTICS
Snugly into bubs' knicker line. No gaps will reduce leaks.
