ARTIST STATEMENT

EMOTIONS

Circles are the perfection of form – spheres their equivalent in the 3-dimensional world of objects. In Psychology these two shapes are often referred to as the Symbols of the Soul.

Vortices represent the twist and turns, heights and depths, quiet and stormy moments of life – they are the maps of my life, the atlas of my soul. Phases of life and perception are governed by a general mood – similar to how the first fundamental coat of paint on the canvases of my vortices series influences your first impression of these paintings. Viewed from a distance the paintings of the «Spheres and Vortices» series present a mere cluster of lines, dots and planes – but when you move in closer and focus your attention on details you begin to discover that there is more there to see than what meets the eye at first glance.

Eventually I began to understand that the vortices affecting our lives are the grinding and polishing in life that offers our soul a chance to mature to peace and perfection. I reflected on this notion in countless sessions of applying layers of different materials and paint to my canvasses.

PROLOGUE EMOTIONS

With her Spheres & Vortices series Antonia Pia Gordon directs her attention not only to the perfect form of the Euclidean circle, to the fascination of the Archimedean sphere and to the fluid dynamics and friction and flow of the vortex but accompanies us on a perspective-based flight through different phases of life, through moods and emotions to a bird's eye perspective of soul-moving moments. With her canvases and multimedia works and with a nod to C. G. Jung, Gordon draws her viewers into a journey of twists and turns and highlights and deepest points, thus offering an invitation to the development of individuation in discovery of the self, the circle, in a search for wholeness and the anima mundi. This series further develops Gordon's search for the soul of the world, the unity of the conscious and unconscious and the search for essential patterns of life and is a witness to the freedom of infinity in the freely flowing strokes and the endless forms.
