*When compatible with Victron Multi/Quattro in off-grid application via Venus-device, it is required to have a Victron MPPT or other compatible PV inverter with Victron to avoid the system getting shut down. **When compatible with Voltronic Xpert series, only VM III and King two types are available for RS485 communication, for the rest types of Xpert only available for manual settings. When using VM III and King, only launch firmware 02.61 or higher can work with Force L1/L2. ***When compatible with Growatt SPF/M series corresponding type, according to inverter logic, the depth of discharge (DoD) of battery shall be set to 80% or lower. Otherwise may lead to system shut down and need of manually recharge battery. ****When compatible with SMA SI4.4-M / SI6.0-H / SI8.0-H, it's required to follow the min. configuration table from SMA for a guaranteed configuration. The Force L1/L2 is not compatible with SMA SI series. *****When compatible with Senergy inverter, max. configure 1 string of battery system, do not support multiple strings connection.
