Model	MX100R/B/C*	MX250R/B/C*	MX500R/B/C*
Extinguishing Agent	Purple K	Monoammonium phosphat	te Monoammonium phosphate
Agent Weight	1.0 lb.	2.5 lb.	5.0 lb.
Gross Weight	2.2 lb.	5.0 lb.	8.8 lb.
UL Classification	2B:C	1A:10B:C	3A:40B:C
Height	10.0 in.	14.8 in.	15.3 in.
Width	3.6 in.	4.5 in.	7.25 in.
Cylinder diameter	2.6 in.	3.0 in.	4.3 in.
USCG Approval	None	5-B	20-B
Discharge range	5-8 ft.	9-15 ft.	12-18 ft.
Discharge time	8.5 sec.	9 sec.	14 sec.

MaxOut<sup>™</sup> Dry Chemical fire extinguishers are a proven defense against flammable liquid fires, and they don't conduct electricity back to the operator – so important in an automotive environment. MaxOut<sup>™</sup> extinguishers containing more than 1 lb. of agent are also "A" rated for common combustibles like wood, paper, rubber, and some plastics. This added effectiveness makes them ideal for outdoor, marine and home use as well. MaxOut<sup>™</sup> extinguishers contain free flowing and noncaking additives and will not "brick up" like some dry chemical extinguishers can.

\*Available finishes: R - Red powder coat; B - Black powder coat; C - Chrome-plated

## **MOUNTING OPTIONS**

#### **EXTREME DUTY QUICK RELEASE BRACKETS**

Our quick release Extreme Duty brackets fit our 2.5 lb. and 5 lb. extinguishers and provide a secure mounting solution for flat surfaces or 1 5/8" and 1 3/4" roll bars.

Model	Description*		
NB300	Flat surface mount for 2.5 lb. extinguishers		
NB425	Flat surface mount for 5.0 lb. extinguishers		
NBR301	15/8" Roll bar mount for 2.5 lb. extinguishers		
NBR401	15/8" Roll bar mount for 5.0 lb. extinguishers		
NBR302	1 <sup>3</sup> / <sub>4</sub> " Roll bar mount for 2.5 lb. extinguishers		
NBR402	1 <sup>3</sup> / <sub>4</sub> " Roll bar mount for 5.0 lb. extinguishers

#### **SM01BK - FIRE EXTINGUISHER SEAT MOUNT**

Our **\$M01BK** fire extinguisher seat mount installs easily in many (though not all) vehicles, attaching to the seat rail bolts or above the slider of the driver or front passenger seats.\* Not only does this put the extinguisher at your fingertips, but it avoids the need to drill mounting holes into your vehicle.

- Places extinguisher within driver's reach
- Provides a versatile mounting platform for any H3R Performance flat surface bracket
- Fully adjustable, lightweight aluminum construction

<sup>\*</sup>Mounting to seat rail bolts may restrict forward seat motion on certain vehicles.

Mounting to seat slider (where possible) maximizes range of seat movement.

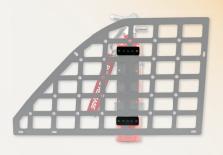

### **BBP01 - BRACKET BACKING PLATES**

Our **BBP01** Bracket Backing Plates simplify the installation of mounting brackets to MOLLE panels or flat panel surfaces. Just align the threaded backing plate holes with the mounting holes of our Extreme Duty or standard bracket and use the included screws. Each set includes two,  $2.6^{\prime\prime}$  x  $1^{\prime\prime}$  plates.

- Places extinguisher within driver's reach
- Provides a versatile mounting platform for any H3R Performance flat surface bracket
- Fully adjustable, lightweight aluminum construction

**⚠ WARNING:** Cancer and Reproductive Harm www.P65Warnings.ca.gov

<sup>\*</sup>Designed for use with H3R Performance fire extinguishers.
