our rims models :

How to proceed with your made-to-measure project?

1. Contact your sales representative
2. Provide us with a vector file of your logo or design according to the rim model specifications
3. Validate the print approval of your logo according to the profile to be engraved
4. Validate samples for production launch.

Practical information :

- Laser engraving available on models with black anodised finish
- 2 logos on each side
- Engraving window up to 100mm long, variable height depending on rim profile
- Coloured markings are not possible
- Design using gradients, hatching, outlines, is possible.
