

# Where design and functionality unite

Ortal is a leading designer and manufacturer of high-end contemporary gas fireplaces, with a reputation for choice, quality, durability and ease of installation.

The creation of stunning fireplaces that are safe, beautiful and efficient is only made possible with the company's resolute focus on design and technology, which allows Ortal fireplaces to be installed where others cannot.

## Redesigning fire since 1986

Discover a range of gas fireplaces where frameless minimalist design meets robust technology to produce the most natural looking flames.

# The advantages of Ortal

## Cool Wall Technology

Ortal's Cool Wall Technology ensures the walls surrounding your fireplace remain cool, so you can hang your TV or artwork directly above.

## Lighting

Built-in, recessed internal lighting with dimming capabilities, that can be controlled remotely, creates ambiance even when your fireplace is not in use.

## Creative interiors

With a large selection of logs, pebbles and glass, you can customise the interior look of your Ortal fireplace to suit your style and home.

## Direct vent

All Ortal fireplaces are sealed from the room using a glass front, so the combustion air is not drawn in from the room and will not affect the air quality inside your home.

## Heat barrier solutions

Ortal fireplaces are engineered for maximum enjoyment and protection, with a screen or double glass heat barrier delivering safety without compromising aesthetics.

## Innovative design

Ortal's innovative product design and advanced features provide every Ortal fireplace with the versatility to match your lifestyle or design concepts.

## Power flue system

Fan-assisted Power Flue Technology can remove exhaust up to 27 metres from the fireplace, enabling the creativity of design without limitations.

## Smarthome

Control your Ortal fireplace remotely with your home automation system or from a smart device by using the MyFire app, providing safety and peace of mind.

# Over 80 gas fireplaces models and sizes

Every Ortal fireplace has features you will love:

- › Natural looking fire with warm yellow flames
- › The pristine lines of frameless design
- › Outstanding installation flexibility
- › Simple controls and built-in safety
- › Multiple interior firebed options.

## Single sided

Single Sided fireplaces integrate into walls and architectural elements beautifully, combining classic charm with the revolutionary performance of Ortal's modern gas fireplaces.

## Space Creator

Ortal's Space Creator fireplaces are a visually stunning way to separate living zones while maintaining an expansive and free flowing look from room to room.

# Double sided

Double Sided fireplaces are encased in walls or columns to emit warmth and beauty in two separate areas, dividing living spaces with contemporary style and modern efficiency.

# Three sided

Built-in and modern Three Sided fireplaces provide a clear view from multiple vantage points, creating an impressive architectural element to any space within your home.

## Stand alone

Stand Alone fireplaces are ideal solutions for adding a contemporary fireplace to any space, as they require minimal installation and therefore limit the disruption to your home.

## Corner

Wide or narrow, cozy or imposing, Ortal's left-side or right-side gas corner fireplaces are an ideal and flexible architectural solution that brings focus to any space.

# Multiple configurations

With so many options to choose from, there's an Ortal gas fireplace that's perfect for your home. These are the current models available in Australia and corresponding sizes of the viewing area in mm (width x height).
