Wöhler

VIS 350

The Wöhler VIS 350 is a compact and advanced video camera system that illuminates dark spaces allowing you to inspect and record inside drains, sewer pipes, waste water pipes, flue gas and ventilation lines as well as allowing for general industrial and building inspections.

Rugged and Affordable Inspection System

The Wöhler VIS 350 has been a mainstay in multiple industries for many years and is a complete system with a 30m pushrod and a choice of camera heads. It not only offers you a perfect all-round view of the inside of drains, sewer pipes and other inspection areas, but also lets you precisely locate the damage and accurately document the results of the inspection.

Our industrial camera kit features a colour camera head, with your choice of optional 40mm pan & tilt colour camera and/or 26mm forward-facing colour camera, both offering a super bright image on the 7" LCD display.
