

Electric deck oven for pizza

2 decks composition

iDeck consists of one or two baking chambers and an optional leavening compartment or stand. The oven baking surface is made of refractory material that provides perfectly even heat distribution over the whole surface, making this oven particular suitable to bake pizza, either directly on the surface or in trays. Temperature adjustment is electronic, with independent control of the ceiling and floor heating elements. The oven door is hinged at the bottom, with a tempered glass window to check the state of the product while it is baking. The stand comprises a painted metal structure, whereas the leavening compartment has a stainless steel structure and is fitted with a heating thermostat. The leavening compartment can reach a maximum temperature of 65°C (149°F), whereas the maximum temperature of the baking chamber is 450°C (842°F).

FUNCTIONING

- · Heating by armoured heating elements
- Electronic power management with independent adjustment of ceiling and floor (Dual-Power Technology $^{\text{TM}}\!)$
- Electronic temperature management with independent adjustment of ceiling and floor (Dual-Temp Technology®)
- Maximum temperature reached 450°C
- Continuous temperature monitoring with 2 thermocouples

CONSTRUCTION

- · Front structure made in folded stainless steel
- Oven panels made pre-painted metal sheets
- Door in stainless steel with shutter with hinge at bottom with balancing spring
- Door handle in stainless steel
- Tempered crystal glass
- Control panel on the right front side
- Baking surface in refractory brick
- Upper and lateral structure in aluminized sheet
- Thermal insulation in mineral wool
