Razor Sharp Laminated Japanese Steel Blade

The blade edge is sharp Japanese high-carbon steel and is laminated with softer steel.

Hand-forged welding

Compared to machine-forged welding (left), this product (right), forged by hand, is stronger because the sides of the blade are also covered with steel.

Weight(g): 476
Head Length(mm): 90
Head Weight(g): 375

Side Hitting

The side surface is flat, so you can lay your head down to hit in a narrow space.

Double Head

The flat side is for normal use, and the domed side is used at the end of nailing to avoid damaging the wood.

Head Length(mm): 70
Head Weight(g): 570

Large Round Face

The DARUMA hammer is featured a large striking surface. It is ideal for chiseling and engraving.

Double Head

The flat side is for normal use, and the domed side is used at the end of nailing to avoid damaging the wood.

Heavy Duty Double Wedge

The head and handle are firmly fixed in place with a wooden and iron wedge hammered in a cross pattern, making it strong and hard to rattle.

Stainless Chromax (V-Gin1 Semi-Stainless steel)

This steel has the advantages of both carbon steel (blade steel) and high-grade stainless steel. It is an ideal steel that satisfies the conditions of a sickle's sharpness: rust-resistant, chip-resistant, and long-lasting good cutting.
