LIGHT SPORTS AUDIO LABEL

HAKII explores sports lifestyles and creates brand new smart sports lifestyle for young people based on the research on sports life scenarios. From the beginning of its establishment, HAKII comes into play in the casual sports audio products field, and introduced internationally reputable Bluetooth earbuds, including G1 Pro, Action, Ice etc. In 2022, based on existing designing concept and development experience, HAKII started to march into the new realm of smart sports gears by exploring sports scenarios, and released HAKII MIX - the first Smart Headband Headphones in the industry. The next step for HAKII will be an extension to smart sports hardware that adapts to popular culture of the youth, while fulfilling the potential sports needs for intelligence, social, and personal characteristics.
