

WM Aqua+ Filler E800 / E850

Water repellent Paste Fillers for wood

Ready-to-use paste fillers of high-quality created especially for wood repair purposes. Texture is easy to apply and to work with.

The E800 and E850 differ from other fillers thanks to their excellent water repellency. Perfect for outdoor use! The fillers are compatible with all kinds of surface coatings.

E800 and E850 are both made from mineral components and are therefore safe to use.

E800

All-round use. E800 is mostly applied on windows, doors and furniture.

Available in a handy 400 g tube.

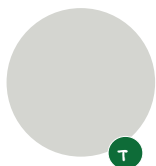

E850 - Floor Filler

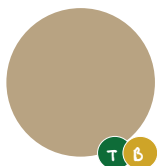

Slightly thinner texture than E800. This makes the filler perfect for full-floor coverage.

Creates minimal dust when sanded.
