

**THIS IS JUST A STEP BY STEP INSTRUCTION
FOR OUR CUSTOMERS TO GET BETTER IDEA
HOW TO INSTALL THE ANGEL EYES.
WE CANNOT BE HELD LEGIBLE FOR
ANY DAMAGES OR MISTAKES YOU MAKE.
IF YOU ARE NOT SURE WHAT TO DO OR STUCK
ON THE PROJECT PLEASE CONTACT US.**

#1 FIRST CUT OFF THE LENSES!

LIGHTWÜRKZ©

**#2 CUT OFF THE HOUSINGS ABOUT
15MM**

The image shows two grey plastic LED light housings. The housing on the left has yellow lines and arrows indicating where to cut. A horizontal line is drawn around the middle of the housing, with an upward-pointing arrow above it and a downward-pointing arrow below it. A vertical line is drawn on the side of the housing, with a rightward-pointing arrow to its left. The housing on the right has a red wire connected to its base. The background is a plain, light-colored surface.

GLUE THE RING!

**FOR THOSE WHO HAVE A SOLDERING IRON
YOU CAN SIMPLY JOIN THE END OF THE
RING AND PART OF THE HOUSINGS
TOGETHER**

LIGHTWÜRKZ©

**APPLY THE LENSES BACK, YOU CAN USE
SOLDERING IRON OR A GLUE.**

**TO MAKE SURE THE LIGHTS WILL NOT
HAVE ANY AIR POKERS USE SILICONE
SEALER TO GO OVER THE EDGES**

YOU CAN USE QUICK GRIP GLUE AS SHOWS IN THE PICTURE BUT THIS GLUE WILL NOT MELT DURING THE EXTRA HEAT.WE RECOMMEND USING THIS GLUE DURING THE VERY HOT TEMPERATURES. USE TOOTH PICK TO APPLY THE GLUE TO THE AREA. LET THE GLUE CURE FOR 12 HOURS. WE STRONGLY RECOMMEND USING THIS GLUE BECAUSE IT DOES NOT HAVE A MELTING POINT.
