

# Needle Stick Injury

MANCHESTER  
1824

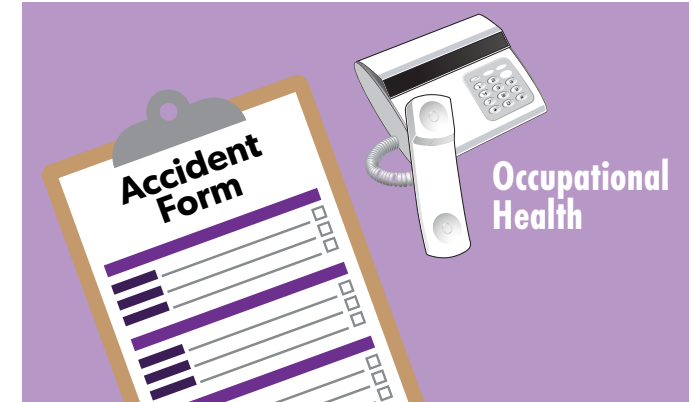

- 1** If you receive a needle-stick injury, encourage the wound to bleed, by squeezing it.

**Do not suck the blood from the wound.**

- 2** Wash wound with plenty of warm soapy water.

- 3** Complete an Accident and investigation form.  
Inform Occupational Health

- 4** Inform your Supervisor or Safety Services, who will complete an Investigation Form.

- 5** Attend the nearest A&E for treatment and tests.  
If required follow up with counselling for professional support.

- 6** All Domestic staff must attend needle stick injury training.
