# GPR400

Retail

€895

The Body-Solid GPR400 Power Rack is a heavy-duty Power Rack designed to fit in several facilities from home gyms, garage gyms to commercial strength training facilities, sports team weight rooms and more.

A wide walk-in design gives users increased space and comfort when using the rack for a multitude of movements including squats, lunges, rack pulls and deadlifts. Add a Body-Solid bench and open up several new workout possibilities including decline and incline press, bench press, shoulder press and more.

Constructed with 11-gauge steel frames and oversized industrial-strength hardware, the GPR400 offers superior durability and is built to withstand the intensity of heavy powerlifting and frequent group training.

With a height of 201 cm, the GPR400 features a shorter height than most competitive Power Racks and will fit more comfortably in home, garage or basement gym settings. An integrated 32mm diameter pull-up bar adds additional functionality to the GPR400 Power Rack with the ability to perform pull-ups, chin-ups, leg lifts and oblique twists.

Each GPR400 comes standard with pipe & pin safeties and J-cup liftoffs. Optional attachments and accessories including the GLA400 Lat Attachment, SPRCUA Multi-Chin, GPRDH Dip Handles, GPRTBR T-Bar Row, GPRUL U-Link and GPRWH Weight Horn allow complete customization to fit facility and user needs.
