

# TRX3500 TREADMILL

The TRX3500 features a large 6.5" Blue Backlit LCD display with 30 preset programs for users of all fitness levels. Other convenient features include the console direct access speed and incline buttons for fast workout changes, additional handlebar mounted controls for both speed and incline, speakers for your favorite tunes, and a cooling fan to keep you cool.

With the XTERRA status comes our seal of approval with an impressive lifetime frame and motor warranty, 2 years parts, and a full 1 year of in-home labor. The speed range up to 12 mph is powered by a smooth and quiet XTERRA 3.0 HP motor. XTRASoft deck cushioning technology, oversized 20" x 60" running surface, and 0-12% incline range are included in the long list of premium features. When not in use you can fold up the treadmill with the Lift Assist frame design, which also includes a Safe Drop feature that slowly lowers the deck for added safety.
