Install battery

3. Open the battery cover

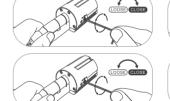

5. Install battery

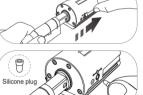

6. Fix the battery cover and tighten

Adjusting the length of the lock cylinder

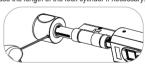

In accordance with the required lock cylinder length, you can adjust the internal and external length by loosening the screw with an inner hexagon spanner and pulling out the handle as needed; if necessary, you can increase the lock cylinder length by using an extended lock cylinder piece and tighten the screw after adjustment. Plugged the adjusting hole with a silicone plug, which can play a certain waterproof role.

FAQ

• How can I know the lock is out of power?

Each time you use, there is a screen above the fingerprint device shows the power. Low battery suitable, APP will prompt lowbattery tips, and send text messages to the phone.

• Does the lock knob still works after I replaced the lock?

It still works. It only replace the cylinder. It won't effect the other function of the original lock.

Will it read slowly or fail to recognize the fingerprint afterlong time using?

It won't. The fingerprint sensor has a special protect film on it.

• Is it complicated to set?

It's easy. You just need to use the thimble to press the set key to register the fingerprint. The screen will show you the function to choose and just press your fingerprint on it.

If we install all the houses' doors with We.Lock, can we usethe phone APP to unlock all of it?

Yes, you can. One phone can in charge many different locks. Just remember to mark the name of each lock.
