Bring your space to life with colour!

Welcome to our new world of colour in public and education seating. With three new product suites which combine sound ergonomics with a huge variety of colour choices, our latest ranges give designers and users the chance to create energising spaces to tackle the future. Posture and position throughout the day, keep you ergonomically supported whilst you tackle the day's work.

The importance of colour in public furniture cannot be overstated as it plays a crucial role in creating harmonious and productive environments. Colour choices in furniture influence the overall atmosphere, well-being, brand representation, and functional aspects of the workplace, school, community centre or wherever there is a need for quality seating.

One of the primary functions of colour in public furniture is setting the mood and ambiance within a space. Neutral and muted colours, such as Whites, Greys, and Browns, are often associated with professionalism, elegance, and a sense of calm. These colours are frequently used in professional areas to create an environment conducive to focused work and
concentration. In contrast, vibrant and bold colours, such as Blues, Greens, and Reds, can infuse energy and creativity into collaborative spaces, meeting rooms, and breakout areas.
These lively colours stimulate a dynamic atmosphere that encourages teamwork, innovation, and social interaction.

Colour is also a powerful tool for brand representation. Public furniture should reflect an organisations identity and values, making the selection of colours a crucial part of brand communication.
User well-being and productivity are greatly affected by the colours used in corporate furniture. Ergonomic and comfortable office chairs and workstations in calming colours promote physical comfort and mental relaxation.
In addition, colour in public and education furniture can be utilized to differentiate and define various functional zones within a larger space. Perhaps different colours for different year cohorts at schools.
The importance of colour in public furniture cannot be overlooked. It impacts the overall ambiance, brand representation, user well-being, and functional aspects of your space. Careful consideration of colour choices in design is essential to create a space that aligns with your goals and values, supports productivity, and conveys the desired brand image.

Optional Bag Hook

KALEIDO CANTILEVER CHAIR

Kaleido combines serious ergonomics with svelte human based shapes and splashes of colour which are unmatched in plain furniture. Kaleido uses a 3 part polypropylene shell to combine complimentary or contrasting colours in striking arrangements. Maybe it's school colours, maybe it's corporate colours or it's just colours that look great together.
DESIGN YOUR KALEIDO CHAIR

1. Select a shell colour

Seats are available in 6 colours. Note all back covers are white. Other colours are available on indent (minimum 300).
