

Description:

Ideal for high-end photo reproduction and fine art. This glossy canvas will deliver the highest dmax levels and widest range color gamut when used with photo black inks. It has a smooth weave and consistent weave. Can be stretched without cracking. It does not require varnishing which increases production time. Perfect for home décor, museum and gallery prints.

Specifications:

- Weight: 420gsm
- Basis Caliper: 21mil
- Opacity: 98%
- Brightness: 84
- Whiteness: 98
- Finish: Gloss (8 @ 60°)
- Ink Compatibility: Aqueous, Latex and UV
- Laminate Compatibility: Not Required
- Core Size: 3" w/ 2" Adapter

Storage:

Store in a controlled environment, approximately 70°F (21°C) +/-10°F and 50% RH +/- 10%, free from dust and direct sunlight in original packaging until ready for use. Shelf life 12-15 months under these conditions. After printing return unused media to original polyester bag/packaging for storage.

Printing:

For best performance, print in a controlled environment approximately 70°F/21°C with 35-65% relative humidity. As with all inkjet media, handle media at the edges to avoid touching the imaging area as fingerprints and oils from hands can repel ink causing poor image quality. We recommend calibrating the media for optimum quality. Actual results can vary depending on proper ink limitation, printer/rip settings and color management used. Allow prints to dry for at least 30 minutes. Drying time may vary depending on printer, inks, amount of ink used and environmental conditions (images with heavy ink coverage may require a longer drying time).

Finishing:

None required. Liquid laminate if desired.

Lamination can provide an enhanced finish and extended print life through protection from dirt, abrasion and ink fading from UV exposure. Allow print to completely dry prior to laminating.
