

## Description:

An 8mil (150Dx150D) matte polyester fabric with removable/repositionable adhesive. Easy to put up and to take down. A8MFR can be applied without bunching or bubbling in one easy step and will not stretch out. Scratch resistant and extremely durable. Use on smooth walls as décor graphics. Also can be used for window graphics and point of purchase displays.

## Specifications:

- Weight: 200gsm
- Basis Caliper: 8mil
- Weave: 150D x 150D
- Liner: 145gsm / 6mil
- Opacity: 85%
- Brightness: 96
- Whiteness: 125
- Gloss @ 60°: 3
- Core: 3" w/ 2" Adapter
- Ink Compatibility: Aqueous dye and pigment / Latex / UV

## Storage:

Store in a controlled environment, approximately 70°F (21°C) +/-10°F and 50% RH +/- 10%, free from dust and direct sunlight in original packaging until ready for use. Shelf life 12-15 months under these conditions. After printing return unused media to original polyester bag/package for storage.

## Printing:

For best performance, print in a controlled environment approximately 70°F/21°C with 35-65% relative humidity. As with all inkjet media, handle media at the edges to avoid touching the imaging area as fingerprints and oils from hands can repel ink causing poor image quality. We recommend calibrating the media for optimum quality. Actual results can vary depending on proper ink limitation, printer/rip settings and color management used. Allow prints to dry for at least 30 minutes. Drying time may vary depending on printer, inks, amount of ink used and environmental conditions (images with heavy ink coverage may require a longer drying time).
