TECHICAL DATA SHEET

12mil Semi-Gloss Super Heavy Banner Fabric

Description:

This heavy weight fabric (600dx600d) can be used for a multitude of applications. Hanging banners, theater drops, décor, gallery wraps and much more. Very strong and practically tear proof. Top coated with a matte, semi-satin finish. Can be recycled when using latex inks. Compatible with Solvent, Eco-solvent, Latex and UV printers.

Specifications:

- Weight: 230gsm
- Basis Caliper: 12mil
- Opacity: 82%
- Whiteness: 85
- Ink Compatibility: Solvent / Eco-Solvent / Latex / UV
- Laminate Compatibility: Not Required

Storage:

Store in a controlled environment, approximately 70°F (21°C) +/-10°F and 50% RH +/- 10%, free from dust and direct sunlight in original packaging until ready for use. Shelf life 12-15 months under these conditions. After printing return unused media to original polyester bag/packaging for storage.

Printing:

For best performance, print in a controlled environment approximately 70°F/21°C with 35-65% relative humidity. As with all inkjet media, handle media at the edges to avoid touching the imaging area as fingerprints and oils from hands can repel ink causing poor image quality. We recommend calibrating the media for optimum quality. Actual results can vary depending on proper ink limitation, printer/rip settings and color management used.

Finishing:

Not Required.
