

CHOICE OF CHAMPIONS

- The Beiter Nock guarantees a consistent release from the bowstring, shot after shot!
- Each nock size is produced with the same single mold
- This offers the highest precision and lowest tolerances

Beiter Insert Nock .204"

Beiter Nock Size: Asymmetrical #1, Asymmetrical #2, & Hunter

Easton 5MM FMJ models
Easton 5MM Axis models
Easton 5MM Carbon Legacy

Available in both Asymmetrical and Hunter options, the popular .204" inside diameter model arrows pair perfectly with the single mold construction of a Beiter Nock. Lancaster Archery Supply recommends the Hunter variation of the Beiter .204" Insert Nock for these popular bowhunting and 3D arrow shafts for compound archers.

Beiter Pin Nock

Beiter Pin nocks are by far the most popular nock choice for discerning archers who use a pin system at the nock end. Beiter Pin Nocks are available in a #1, #2, Hunter #1, or Hunter #2 sizes.

Beiter Hunter Nock

Beiter Nock Size: 19-2

Easton 6.5 use 19-2
Easton Carbon Legacy uses 19-2
Easton Superdrive models with 6.5MM uni-bushing
Easton Rx7 models with 6.5MM uni-bushing
Easton XX75 GameGetter with 6.5MM uni-bushing
Easton X7 Eclipse with 6.5MM uni-bushing
Easton X23 or X27 with 6.5MM uni-bushing
Easton XX75 Platinum Plus with 6.5MM uni-bushing
Easton XX75 Jazz with 6.5MM uni-bushing

Hunter Nock installs directly into rear end of shaft or arrows with unbushing systems. Beiter Hunter Nocks are a symmetrical nock designed for compound archers using a d-loop. Compound archers should use #2 throat sizes in most instances. Finger shooters may decide to use a #1 or #2 depending on serving diameter.
