Crystal Coating & Brightener *Pomponazzi*®

Pomponazzi, since 2002, now it has become a brand with over two-hundred locations in 25 countries. Over the past two decades, we have made numerous achievements to improve the quality of life of our customers through constant investment in R&D and customer satisfaction analysis. Most notably, we were the first to introduce hydrophobic effect or balsoo effect, which was inspired by taro leaves into our products. We attribute these achievements, among other things, to the Pomponazzi teams around the world, whose commitment to making our products as safe as possible for our customers, and who have made customer satisfaction their number one priority.

“WOODEN FURNITURE
More vivid color, wood grain intact & revived”

© BLOG POST BY hui_episodes

Pomponazzi Living Coat is used by many Korean companies that manufacture high-end wooden furniture. And it is a product preferred by many masters of carpentry. They are big fans of our product when making handcrafts such as knife with wooden handle, chair, table, shelf, and many more. Pomponazzi Living Coat is a perfect coating agent to be used as a finish of wooden furniture. It is designed to revive and preserve the true color of wood and the surface of wood without change. The splendid outcome is enough to satisfy masters of wood. So Pomponazzi Living Coat is a product that has become popular with many online and offline customers through word of mouth from masters.

“Inorganic Coating of soft texture
and gentle luster”

review post by @donggrihouse

Pomponazzi Living Coat gives your wooden furniture a silky texture and gentle shine, also a great protection with double layers. Just by applying this potion, it will upgrade the quality of your furniture. For this reason, it is also highly recommended to be used for old furniture or furniture restoration. Inorganic based chemical composition of the product makes wood revived. And once applied, the furniture will become invariable, meaning it does not deform. This gives the wood surface a strong resistance to become sticky with time.

“Minimizes the stain
and makes cleaning work easier.”

@doju.haus

Bathroom molds and stains are also reasons why many customers look for Pomponazzi Living Coat. Once Pomponazzi Living Coat is applied on the cleaned surface, water stains and molds appear late and even though they appear become easy to be cleaned. To mention an additional convenience, mirrors and glass become less foggy once it is applied. However, these effects won't last forever because Pomponazzi Living Coat is designed for regular care, and the bathroom is a place that gets wet and damp frequently. Nonetheless, hydrophobic effect (/water repelling effect) will be of of a great help when caring your bathroom.

I can really see how the surface became so smooth and shiny

Kitchen is another notorious place that bothers our customers. Another name of this place probably could be a battlefield where sauces, ingredients, and spices are flying everywhere to win a fine and glorious dish. And they stain marble or wooden kitchen top so easily. Whenever cooker touches the fridge, there is a very high possibility of contaminating its surface with handprints or spices on their hands. However, don't worry. Because Pomponazzi Living Coat is the perfect answer to all these troubles. Moreover, it will make your kitchen shine, make everything smooth, and convert your kitchen to a contamination-free space

NATIONAL SAFETY TEST REPORT

KOREAN TESTING & RESEARCH INSTITUTE CHEMICAL SAFETY TEST

Pomponazzi passed all tests with no hazardous chemical substances detected. All the tests from KTR follow the Standard International Criteria, Chemical Safety Test & International Criteria.

TEST NUMBER: F-A05B-H00510001-A180 2/4

Annex1. Result(1)
1.1 Standard of Hazardous Substance

S.N.	Substance	UNIT	Criterion	Result	PASS/FAIL
1	Formaldehyde	mg/kg	≤50	None	PASS
2	Acetaldehyde	mg/kg	≤70	None	PASS
3	TCE	mg/kg	≤1,000	None	PASS
4	Naphthalene	mg/kg	≤200	None	PASS
5	Dimethyl Formamide	mg/kg	≤90	None	PASS
6	Benzene	mg/kg	≤180	None	PASS
7	Nikel	mg/kg	≤10	None	PASS

KTR KOREA TESTING &
RESEARCH INSTITUTE

We wanted to develop a product that is safe for houses with children and pets, and it was a success. We first launched Pomponazzi Living Coat in South Korea. And most of our customers have children and pets in their houses. They choose Living Coat because they don't need to wear masks and gloves. Moreover, our product is odorless, so it never troubles your nose with foul smell. The easiest way to check if a product contains harmful ingredients as petrochemicals is to set fire on it. But our product's price is not that low so visit our homepage or Youtube to check the experiment.

It is a product that passed KTR (Korea Testing and Research Institute) chemical safety test. And KTR test is known for having the strictest standards for chemical products. There's a certain amount of tolerance for harmful ingredients that won't affect you, but we all passed with a "0." And that's not very common in the household chemicals market. Tested harmful substances were Formaldehyde, Acetaldehyde, TCE, Naphthalene, Dimethyl Formamide, Benzene, Nickel, and many more. None of these substances were found in the product.

코팅제

means coating in Korean and it is the most competitive keyword of its kind.

Both of them are

Ads

So they are excluded in the ranking.

Ranking #1 is Pomponazzi Living Coat

This is a success after one and a half year after its first launch in South Korean market. The secret behind its success and the reason why no one can copy Living Coat is thanks to accumulated know-hows and technologies for a very long time. And company-wide commitment and countless Pomponazzi fans' support made this outcome. Pomponazzi Living Coat is the one and only 100% inorganic coating agent designed to assist household chores. Even though it does not remove all the water stain and contamination, it helps to make them way easier to clean.
