| Patient ID: | | Exam Name: | CT Heart/Coronary Calcium Scoring I 75571 |
| Age: | 58Y 6M | Reason:: | Encounter for screening for cardiovascular disorders I Z136 |
| DOB: | | Referrer: | JAMES MAHONEY, MD |
| Acc #: | | 2nd Referrer: | |

PROCEDURE: CT HEART/CORONARY CALCIUM SCORING

INDICATION: Screening; encounter for screening for cardiovascular disorders.

COMPARISON: None available.

TECHNIQUE: EKG-gated CT scan of the chest for coronary calcium score evaluation was performed.

FINDINGS: The total coronary calcium score is 0.0. There is no evidence for coronary artery disease.

There is no evidence for lymphadenopathy in the visualized mediastinum. No pericardial effusion. There are no focal lesion in the visualized liver or the spleen.

There is dependent atelectasis at the lung bases. There is mild degenerative change in the visualized spine.

IMPRESSION:

1. The total coronary calcium score is 0.0. There is no evidence for coronary artery disease.

Physician/Physician offices only: We appreciate the opportunity to participate in the care of your patient. If you are a physician and have questions about this report or would like a consultation with a subspecialized radiologist, please call the American Radiology consultation hotline, at 214-841-3010 for prompt service. Patients should contact the referring physician that ordered their exam for clarification or questions concerning their report.

This exam was interpreted and dictated from zip code 76015.

This report was corrected by Paula Weatherly.

This report was dictated at 76092_SLK1 and electronically signed by Rajesh Gogia, M.D. on 3/1/2021 2:08 PM CST.

All CT scans at this facility use dose modulation, iterative reconstruction, and/or weight based dosing when appropriate to reduce radiation dose to as low as reasonably achievable. DICOM images are available for review.

Dr. Rajesh Gogia, M.D. is affiliated with American Radiology Associates.
