

# CIU Brochure

Flecto Sense Customer Interface Unit (CIU) is a solution designed for individuals to access meter readings without having to go outside. Saving you time and money and making life easier.

Included

5V power supply

Customer Interface  
Unit

Optional \*

USB to 5.5mm plug.

# Water Management System

## Powered by Flecto Sense

- The Customer Interface Unit can read and display meter data and hosts a variety of other functions.
- Immediate feedback to users on water usage, credit balances, excessive usage detection and leak detection.
- The system enables the user supported functions to be collected via the radio.
- Enable users to manage their water consumption and track usages.
- All communication is secure, only you have access to your user account and data.
- Facilitate revenue collection for STS prepaid meters.
- The CIU can be incorporated into full AMI (Advanced Metering Infrastructure), aimed at automating all facets of meter management.

## Unique

The system is unique in the way the data is always encrypted. Your data will never be in the wrong hands. Know exactly what is happening on the ground while not having to spend time in the mud.

## Target audience

Will this be the solution for you? Ask yourself how easy it is to read your meter. The CIU makes it possible for you to read the meter status in the comfort of your own home.

## Business in a box.

You can count on accurate readings, timely responses and data that makes sense. You will receive warnings when a leak is detected and when you have used excessive amounts of water ie. a burst pipe. Warnings will also be displayed when your meter is dry, water flowing in reverse and if an attempt was made to tamper with your meter.

## Smart ideas

By partnering with a technology company that is on the bleeding edge, you position yourself to always be a trend setting firm. This is what Flecto Sense does daily for hundreds of customers. Join us today.

## Location

The CIU should be placed central to all your meters, ideally in an area where you can hear warning tones if your meter has detected a problem. This product requires power from a wall outlet.

This product can be used with a USB powerbank for mobility\*.

\*Refer to optional extras.

## Saving you money.

Imagine having a system that gives you early warning of a leak, in the old days you would only notice the leak when the water bill gets higher. Our system saves you money by notifying you of a problem when it occurs.
