

## APB Power Booster Exchange Upgrade Terms & Conditions

At APB, we are pleased to offer a credit program to customers who mail us the original booster from their original vehicles under the following terms & conditions:

1. The credit for exchanging a booster starts at \$200. The customer is responsible for the cost of mailing the original booster to APB.
2. To be eligible for credit, the customer must mail the original booster within two weeks of replacing it with the upgraded booster.
3. The original booster must be properly packaged with sufficient material to prevent damage during delivery. Please make sure there is no dent or crack on the original booster before mail out. APB does not accept any exchange booster with damage on its appearance.
4. Upon receiving the product, APB will test and examine the booster function with pressure.
5. If the original booster passes the functional test, we will send credit to the customer.
6. If the test result is a failure, or it appears the original booster was damaged during delivery or dismounting from the vehicle, we will return the original booster to the customer.
