Keyboard Charging

When the battery is too low, the low battery indicator will turn red and flash quickly. Please connect to the power supply to charge in time to ensure that the keyboard has sufficient power to meet normal work.

If the battery of the keyboard is too low, there will be delays and freezes and other problems in typing, which affect normal use.

Power indicator turns red while charging, then turn off after fully charged.

Adjustable Brightness

Switch backlight brightness (Dimly, Medium brightness, Brightest)

| Fn | + | Shift | ➡ | **Switch backlight brightness** |

The first press will turn on the backlight with a very dim brightness.
The second press will increase the brightness to a medium level.
The third press will set the backlight to the highest brightness.
The fourth press will turn off the backlight.
After 1 minute of inactivity, the backlight automatically turns off, and press any key to wake up.
After 60 minutes of inactivity, the backlight will automatically turn off, and the keyboard enters deep sleep mode. Press any key to wake up the keyboard, and the backlight needs to be turned on again.

Product Parameters

Battery Capacity: 1500mAh

Working Current: ≤3.5mA

Sleep Current: 31uA

Charging Current: 330mA(±20mA)

Standby Current: ≤0.3mA

Standby Time: ≥150 Days

Charging Time: < 6 hours

Wake Up Way: Press any key

Keyboard Dimension: 386.4x119.7x12.4mm(Unfolded)

215.5x119.7x20.9mm(Folded)

Weight: 314 g

Tips

1. If it fails to connect normally, it is recommended to turn off the keyboard power, restart the Bluetooth of the device and connect again. Or delete the extra Bluetooth option name in the Bluetooth connection list of the device and reconnect.
2. To switch to a channel that has been successfully connected, first press the channel button firstly, and then wait 3 seconds to keep working.
3. The keyboard has memory function, when the keyboard is connected properly at one channel, turn off the keyboard and turn on again, the keyboard will be in the default channel, and the indicator of this channel is on.

Sleep Mode

1. When the keyboard is not used for more than 60 minutes, it will automatically enter the sleep mode and the indicator light will be off.
2. When you use the keyboard again, you only need to press any key, and the keyboard will wake up within 3 seconds. The indicator will light up again and starts to work.
