

CURVE-BASED MAGNETIC COVER LIFTER USABLE IN 3 DIFFERENT WAYS

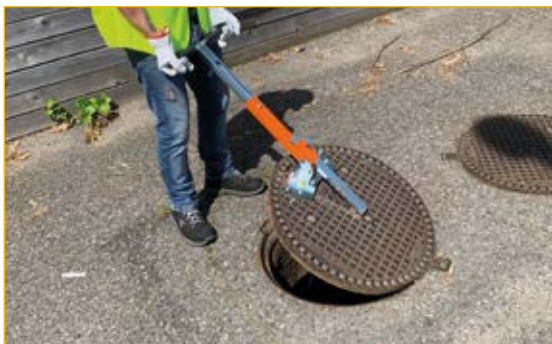

Universal magnetic lifter with curved base to ensure the best magnetic adhesion on the circumference of circular manhole covers also with "filling" cast iron frame and in asphalt / stone / cement with central metal disc.

Use 1: manual Opening.

Use 2: opening with wheeled lever APS90 or APS80.

Use 3: Opening with horizontally extended handle bar.

Extendable front lever that allows the right lift geometry and ensure the full strength of lift and turning of hinged lids.

ACCESSORIES

Anti-magnetic protective sack **Cod. A221006**

It prevents accidental contact between the magnetic plate and metal objects and for safety transport or storage.

TECHNICAL CHARACTERISTICS

Code	K0353	
Weight	Kg	7
Base dimension	cm	28 x 12
Lengthen extension	cm	70
Retracted size	cm	55 x 12
Lifting power	Kg	420 (in condizioni ideali*)
Number and type of Magnets	18 neodmium magnets	

* Attraction force tests performed on a C36 iron base with a thickness of 18 mm. The forces of attraction can vary according to the thickness and material of the base to be lifted. Tolerance ± 5
