DESCRIPTION

Comes in 2 different infinitely adjustable working widths: 700 to 1200 mm (Egaliner-70/120) and 1200 to 2100 mm (Egaliner -110/210). A large amount of material can be moved in a very short time (pre-distribution) and then sreeded precisely. The Egaliner can also be used for roofprofile beddings. Infinitely adjustable roof profile as standard: EL -70/120: 7% EL EL -110/210: 4%. Scraper sheets made from non-rusting stainless steel. Cutter with sharp edge on the lower scraper edges allows materials to be excoriated even there where is compacted sand. Lasting surface protection on all other components thanks to galvanic zinc plating. On both sides infinite height adjustable wheels, with height indicator for adjusting the surface level to the kerb for instance. Adjustment range -40 / +200 mm. - Grip: long 1500 MM; height 1400 mm.
