**\*\*Please note: The suction cup included with this product has its own set of maintenance instructions and requirements. Please review them prior to installation.**

### Step 1 – Fasten the mounting bracket to the rear side panel of the rack

Using one of the supplied M8 Screws and Locknuts, fasten the bracket to your rack using the elongated hole and the center hole on the rear side panel. There is additional room for you to line up the bracket to your preferred location.

### Step 2 – Fasten the zombie guard to the mounting bracket

Using the supplied M8 Screws and Locknuts, fasten the zombie guard to the mounting bracket. There is additional room for you to line up the bracket to your preferred location.

### Step 3 – Attach the suction cup to the Zombie Guard

The supplied suction cup has a pump action to it that create suction. There is also a  $\frac{1}{4}$  x 20 thread on the top of the suction cup for mounting. Line up the thread in the suction cup with one of the small holes in the Zombie guard, then use the supplied  $\frac{1}{4}$  x 20 screw and washer to fasten the zombie guard to the suction cup. Finally, suction the entire system onto your window.
