

ULTIMATE ISOLATOR™ COMPLETE SET OF PROFESSIONAL ISOLATION PADS FOR TWO STUDIO MONITORS

Ultimate Isolators

The most affordable and easiest way to improve the accuracy of your studio monitors is to decouple them from the flat surface they're resting on. By isolating and decoupling them, you'll hear your monitors as they were intended to be heard. Ultimate Isolators reduce unintentional and unwanted sonic energies that result from the transfer of sound to the flat surface, which essentially generates false low frequencies. Ultimate Isolators are easy to set up, work great for nearly any pair of studio monitors (large or small), and the two-part wedge design provides five different angle options.

What's more, Ultimate Isolators have been designed with a unique blend of professional isolation foam and cell density that is specifically tuned to isolate today's best-selling studio monitors better than the competition.
