

24" x 24" x 2" BEVELED-STYLE PROFESSIONAL ACOUSTIC PANELS – QTY 12 UA-WPB-24_12

Ultimate Acoustics Beveled-Style Acoustic Panels

The UA-WPB-24_12 professional Absorption Panel is the perfect blend of form and function for acoustically treating small, medium or large spaces. The beveled edges give an elegant, custom-designed look to any décor, while the solid foam base provides maximum absorption in the smallest possible space. Higher frequencies are fully attenuated for critical placement around the mix position, or the “front” of your space. And Ultimate Acoustic’s free Room Analysis App helps you plan and execute the ideal deployment for your space and application.
