SCISSOR STYLE BROADCAST MIC STAND BCM-200

The BCM-200 Broadcast Mic stand is a scissor style design that offers more reach than the competition - offering a max height of 39" when fully extended. The flexible, scissor style tension mechanism allows the BCM-200 to continuously reposition, offering fluid motion in dynamic environments. The extended drop features a 3.2" length - this gives side connecting mics like the SM7B more positioning options, and adds utility for other models. The non-destructive deluxe mounting system includes a round base that allows easy rotation, and a flexible clamp system which also can be used as a utility hanger.

BCM-200 KEY FEATURES

THE LITTLE THINGS

Grooves in the joint make it a snap to keep cables tidy and tied to the stand without blocking movement. Look as good as you sound.

SOLID BASE

The non-destructive deluxe base system provides a smooth and reliable mount for ease of operation and fluid motion.

INTERIOR TENSION SPRING DESIGN

The "scissor-style" tension spring design offers dependable strength in compact form. The result is a compact, sleek design that's as easy to use as it is to keep tidy.

THE LONGER THINGS

The extended drop provides additional freedom of movement for side connecting mics like the SM7B.

GO THE DISTANCE

Extra long arms give the BCM-200 extra flexibility in crowded studios.

BCM-200 SPECS

- Part Name: BCM-200
- Part Number: 18601
- Max Height: 39"
- Radius 36"
- Max Arm Width: 1"
- Drop Down Boom Length: 3.2" (top to bottom)
- Spring: Interior
