

SELF RETRACTING LIFELINES

The self-retracting lifeline (SRL) range is engineered for extreme workplace situations. Boasting Compliance with AS/NZS1891.3 §1.6, the range has been developed to be durable and efficient anchored lifelines.

Self retracting lifelines (SRL's) extend and retract automatically, allowing the user to operate within the recommended work area permitted by the AS/NZS Standard. The lifeline maintains tension which clears the work zone of any loose and dangerous excess webbing. In the event of a fall, a brake activates, arresting the fall and reducing the impact of the fall.

Multiple options are available from 2m up to 30m to suit almost any situation working at heights.
