

## Spill pallet with removable grate - two 205L drums

### APPLICATION

- Use to store up to two 205 litre drums and capture any leaks, drips and spills.
- Prevent spilled liquids from contaminating floor, inventory or reaching stormwater drains.

### FEATURES

- Accommodates up to two 205L drums
- Drums/containers can be stored on a standard-sized pallet or directly on the grates
- 1100kg UDL (universally distributed load)
- Chemical-resistant polyethylene bund with polypropylene grates
- Removable grated floor for ease of access to the bund sump
- Forklift tyne pockets
- 246L internal sump capacity
- Encapsulated data plates moulded into bund which permanently state:
  - Sump capacity
  - Maximum UDL (universally distributed load)
  - Composition materials
  - Nett weight
- Load tested in Australia by NATA-accredited engineers. Dynamic compression test certificate can be supplied on request.
- Manufactured in Australia

### SPECIFICATIONS

Product name	Spill Crew drum bund - polyethylene with removable grate - two drum
Code	DB2G
Maximum storage capacity	2x 205L drums
Construction material - bund	Polyethylene
Construction material - grates	Polypropylene
Maximum UDL (universally distributed load)	1100 kg
Weight	25 kg
Sump capacity	246 litres
Drain	3x 20mm BSP plug   polyethylene
External dimensions	123mm (l) x 640mm (w) x 515mm (h)
