

Collapsible bunds

APPLICATION

A portable or temporary bund providing spill containment for drums, tanks plant, equipment, vehicles and machinery.

- Self-supporting
- Feature external wall braces enabling 100% use of internal bund floor
- Available in four different material types
- Manufactured in Australia

All bunds:	
Construction method	High-frequency welding - fully-sealed
Wall height	350mm
Wall support battens	Epoxy-coated fibreglass - fabric encapsulated
Wall support centres	400mm
Batten support skirt	300mm
Tie-down eyelets	12mm diameter - welded

SPECIFICATIONS	Contractor Series (CS)	Standard Duty (SD)	Heavy Duty (HD)	Chemical Duty (CD)
Fabric type	PVC	PVC	PVC	CoolGuard FTL30
Colour	Yellow	Orange	Black	Black
Fabric weight (gsm)	650	900	1350	1100
Chemical resistance	Very good	Very good	Very good	Excellent
UV stability	Good	Good	Good	Excellent
Puncture resistance	Good	Good	Very good	Excellent
Tensile strength	Good	Good	Good	Excellent

OPTIONS

- Internal floor protectors or anti-abrasion mats to prevent damage to the bund. Manufactured from heavy duty 545gsm, non-woven UV stable, geotextile material. Featuring polyester webbing hemmed edges
- Drain valves can be installed in one or more of the walls to allow pump recovery of captured spills or drainage of rainwater.
- Standard sizes shown - custom sized bunds can easily be manufactured on request in increments of 400mm
